

DNA Laboratories

Contact the North American Limousin Foundation (NALF) for all DNA-typing supplies and any questions regarding test results. NALF will record DNA-test results, forward them to the members and bill the members' accounts for all laboratory services.

The following addresses are for sending samples to the laboratories for testing.

Parentage, Color, Polled, F94L Tests

MMI Genomics

1756 Picasso Ave.
Davis, CA 95618

Multi-Trait Profiles; Polled, Color, F94L, Feed Efficiency Tests

Igenity

4701 Innovation Drive, Ste. CB 101
Lincoln, NE 68521-5330

Protoporphyrin Test Veterinary Pathobiology

Attn: Gary Johnson
320 Connaway Hall
University of Missouri-Columbia
Columbia, MO 65211-0001

If MMI Genomics receives a sample on Monday, NALF should get the test results by the Friday that is 11 days later. If the sample is received Tuesday through Friday, it will go into the next Monday's batch for testing. MMI is closed much of December for the holidays.

NALF should get test results two weeks after Igenity receives a sample.

Protoporphyrin ("proto") testing is not on a set schedule. Allow at least three weeks for NALF to receive those results.
